CAREER OBJECTIVE

As a Computer Information Systems graduate from Tafila Technical University, I bring practical experience gained through training at Orange Coding Academy. Proficient in web development and software engineering, I excel with technologies such as HTML, CSS, JavaScript, Bootstrap, PHP, Laravel, and React. My hands-on experience includes building dynamic web applications and managing databases. Driven by a passion for full stack development, I am eager to apply my skills in a professional setting. I am looking to contribute to innovative projects and advance in an IT or web development role that offers continuous learning and collaboration opportunities.

Core Competencies

Web Development	Database Management	Creativity and Innovation	Time Management
Full Stack Development	Problem-Solving	Critical Thinking	Attention to Detail
Software Development	Process Evaluation	Team Collaboration	

Technical Skills

Frontend: HTML5, CSS3, JS, Bootstrap, Tailwind ,React.Js,
Backend: PHP, Python, Django, C#, Laravel
Database: SQL, MySQL, SQL Server
Tools: VS Code, GitHub, Figma, Trello, Postman
Operating Systems: Windows
Software Development practices: Agile, Scrum

Experience

- Full Stack Web Development Bootcamp (September 2024 – Present).
- Gained hands-on experience in full stack web development, working with technologies such as HTML, CSS, JavaScript, Bootstrap, PHP, Laravel and React.js.
- Developed a strong understanding of object-oriented programming (OOP) and the Model-View-Controller (MVC) architecture, applying these concepts in building scalable web applications.
- Assisted in the design and management of databases using MySQL, PhpMyAdmin, and SQL, ensuring data integrity and optimal performance.
- Contributed to the front-end and back-end development of web projects, enhancing skills in building responsive and user-friendly interfaces.
- Worked closely with a team of developers to deploy and integrate software solutions, improving collaborative and problem-solving skills in a professional setting

Projects

1- **GamifyTech**: (**link**)
Technologies used: PHP, MySQL, HTML, CSS, JavaScript, Bootstrap

- Worked with a team to create a gamers' supplements e-commerce website offering products like keyboards, mice, and controllers.
- Developed an admin dashboard with full CRUD capabilities, allowing administrators to manage products, categories, orders, and coupons efficiently.
- Designed and implemented a customer-facing site with features like user login, registration, shopping cart, and checkout.
- Ensured database integrity through the use of MySQL and followed OOP principles to maintain a clean, scalable codebase.
- Applied pagination, search filters, and category-based navigation to improve user experience and streamline product browsing.

2- **Bookify**: (**link**)
Technologies used: HTML, CSS, JavaScript, Bootstrap

- Led a team of five as Scrum Master to develop an online bookstore, managing the project lifecycle from concept to deployment.
- Built a responsive and interactive website allowing users to browse, search, and filter books with the option to add items to a Wishlist.
- Integrated a JSON API to dynamically display book data, providing an efficient and seamless browsing experience for users.
- Implemented Wishlist functionality with persistent state management using JavaScript, ensuring user preferences were saved across sessions.

3- **Gender-Based Recommendation System: (link)**
Technologies used: Python, Machine Learning, Pandas, Scikit-learn

- Developed a machine learning model to recommend products based on users' gender and preferences.
- Collected and analyzed data to create personalized recommendations using gender-based classification algorithms.
- Implemented various data preprocessing techniques and evaluated models for accuracy, optimizing recommendations for end users.
- Enhanced the user experience by providing tailored suggestions, improving customer satisfaction and engagement.

Education

Orange Coding Academy, Amman-Jordan   **Sep 2024 – present**

Bootcamp, IT Department

- Intensive course in Full Stack Web Development by Orange Coding Academy in collaboration with Simplon.Co and Princess Sumaya University for Technology (PSUT).

Tafila Technical University, Tafila-Jordan   **2020 - 2024**

Bachelor's degree in computer Information Systems

- Graduated with a very good GPA, focusing on software development, web technologies, and database management.
- obtained a strong foundation in programming languages such as Java, C++, C#, Python, HTML, CSS, JavaScript, and PHP.
- Completed academic projects that involved building web applications, database management systems, and utilizing object-oriented programming principles.
- Participated in team-based projects, developing strong problem-solving, analytical, and collaboration skills.
