Work Experiences:

- Responded to customer inquiries via calls and email, ensuring prompt and accurate support.
- Addressed and resolved customer complaints efficiently, focusing on effective solutions and maintaining high levels of customer satisfaction.
- Ensured exceptional customer support by providing professional and courteous assistance, addressing issues, and meeting service expectations.
- Handled an average of 120-160 chat interactions daily.
- Demonstrated patience by offering prompt support with a professional, friendly, and patient attitude.

# Projects

1) **Parliamentary Jordanian Election System (GitHub Link)**
   **Description:** Developed to streamline online voting, application submission, advertisement management, and election result display. This comprehensive platform, built using ASP.NET MVC5 with C#, aims to facilitate election management in Jordan. The system features distinct interfaces for voters, candidates, and administrators, ensuring an efficient and organized election process. The project documentation includes detailed information on the project, team members, resources, and key functionalities.

2) **Feedback System (GitHub Link)**
   **Description:** A comprehensive course management platform developed as part of our 4th project at Orange Coding Academy. This platform streamlines course management, feedback collection, and progress tracking, enhancing the educational experience for both students and administrators.

3) **HR-Management-System (GitHub Link)**
   **Description:** HR system designed to facilitate various HR-related tasks and processes using HTML, CSS, Bootstrap and JavaScript.

4) **Mini E-Commerce System  (GitHub Link)**
   **Description:**  Developed an e-commerce website for Vegist, focused on selling fruits and vegetables. Features include user-friendly navigation, product listings, cart management, and secure payments. Built with HTML, CSS, JavaScript, and ASP.NET MVC, the site offers a seamless shopping experience with competitive pricing and global delivery.
