Horizon Villas
GitHub Repository

Description: is a rental system that provides a seamless and intuitive platform with a modern design and user-friendly interface. It allows users to browse, rent, and manage home-related tools or services, with integrated features for scheduling, payments, and real-time communication between renters and service providers.
Tools: React/Redux JS, Tailwind , firebase .

Space News
GitHub Repository

Description:A dynamic web platform that delivers the latest news and discoveries in space and astronomy. The platform features real-time updates, categorized articles, and a user-friendly interface for space enthusiasts..
Tools: Node JS , Express JS , React JS, Tailwind , MongoDB .

EXPERIENCE

Full Stack Web Development Trainee   **Dec 2024 - June 2025**
Orange - Coding Academy
Developing Full-stack applications using the MERN stack (MongoDB, Express.js, React, Node.js) alongside HTML, CSS, and JavaScript to build dynamic and scalable web solutions.
Building responsive and visually appealing Front-end interfaces with React, Redux, Tailwind, and Bootstrap, ensuring a seamless user experience.
Designing and consuming RESTful APIs with Node.js, Express.js, and Sequelize, optimizing Backend performance and database interactions.
Working with multiple Databases, including MongoDB, PostgreSQL, and Firebase, to efficiently manage and store application data.
Delivered 10 full-stack web projects, applying skills to real-world scenarios.
Developed scalable, maintainable, and high-performing applications.
