Site engineer Supervising and following up the progress of the project according to the timeline and writing reports and notes.

PROJECT

SONA

SONA is a React-based platform that lets you easily reserve rooms at hotels in different countries. With its user-friendly design, you can browse through various rooms, compare prices, and make secure reservations. It offers features like translation tools, filters for customized searches, and user profiles for managing bookings. By integrating APIs, you can provide real-time availability and pricing information from multiple hotels. Enjoy a seamless booking experience with SONA! https://github.com/LamaNazzal94/React-project

Green Hands

Welcome to the Green Hands Volunteers project! Our platform offers a range of features, including Google and Facebook login options, an admin panel, and user profile dashboards. This project is built using a combination of technologies such as HTML, CSS, Bootstrap, JavaScript, PHP, and Laravel to unite volunteers in the mission of environmental conservation https://github.com/Omaribrahim43/GreenHands-LaravelProject

PO position

E-Commerce Watches

E-Commerce Watches! We've successfully completed our fifth project, showcasing our prowess in HTML, CSS, JS, PHP, and MySQL. The website we've crafted is a true testament to our technical skills and dedication to excellence. https://github.com/Razan-Rjoub/Watches-ecommerce-php

SM Position

ELZERO
