Full Stack Web Developer

CAREER OBJECTIVE

As a Full Stack Web Developer, I bring a strong blend of technical expertise and problem-solving skills, which I am continuing to develop through an intensive training program at Orange Coding Academy,

where I am completing over 900 hours of technical training and 100 hours of soft skills development. I am proficient in a wide range of web development technologies, including HTML, CSS, Bootstrap, JavaScript, C#, MVC, SQL, and TypeScript, enabling me to efficiently handle both front-end and back-end development.

Throughout my educational journey, I have completed over seven projects, taking on key leadership roles such as Product Owner twice. With a solid foundation in analytical skills and creativity, as well as a proven ability to learn quickly and adapt to new technologies, I am eager to apply my skills to drive innovation, enhance efficiency, and deliver impactful solutions in the technology industry.

Technical Skills

Front-End: HTML, CSS, JavaScript, Bootstrap, TypeScript, Angular.
Back-End: C#(OOP) , ASP.NET Core MVC, ASP.Net Core API .
Database: SQL Server.
Software Development Practices (SDLC): Product Owner (Twice), Agile.
 Other Tools: Visual Code, Visual Studio Code, Figma, Trello, Git (Version Control System), GitHub.

Soft Skills

Software Development	Critical Thinking	Time Management
Data Analytics Skills	Problem-Solving Ability	Effective Communication
Requirement Analysis	Project Management	Team Collaboration

Experience

Orange Coding Academy, Irbid/Jordan   **Dec 2024 – Present**
Work Experience:

- Developed and maintained responsive web applications using HTML, CSS, Bootstrap, JavaScript, TypeScript and Angular improving user interface and overall user experience.
- Assisted in building and optimizing back-end services using, ASP.NET Core MVC, ASP.NET Core API and SQL, ensuring the creation of robust and scalable solutions.
- Collaborated closely with cross-functional teams to deliver high-quality code, fostering teamwork and enhancing project management skills.
- Contributed to the design and implementation of database structures, improving data retrieval efficiency, security, and integrity.
- Implemented secure user authentication and authorization mechanisms for web applications.

Projects

1) HR Management System (GitHub)
Description: The HR Management System is a comprehensive web application developed using ASP.NET Core MVC, designed to optimize employee management processes within an organization. The system provides a structured approach to attendance tracking, task assignment, and leave request management, ensuring seamless

2) Library Management System (GitHub)
Description: it streamlines operations for both university students and library administrators. The system ensures an efficient and user-friendly experience for both students and administrators.

3) Photography Store (GitHub)
Photography Store is a group-based Angular project featuring a user-friendly e-commerce platform where users can browse product categories, view product details, add items to their cart, leave comments, and complete checkout with credit card or Orange Money. Users can manage their profiles, view past orders, apply discount vouchers, and search with filters or voice. Admins have a dashboard to manage products, categories, users, and vouchers. The site includes multi-language support and allows sharing products on Facebook.

4) Task Management System (GitHub) Description: Personal Task Management System is an MVC-based web application that helps individual users organize and track their daily tasks. Users can create, update, and manage tasks, view progress through dynamic dashboards, and stay productive with real-time status updates and summaries.

Education

University Name: Al-Balqa Applied (Granada College)
Year of Graduation: 2018
Degree: Surveying Engineer

Courses and Certificates

- **RTK (Real-Time Kinematic) Surveying Certification**
