Full Stack Web Developer

CAREER OBJECTIVE

I am a dedicated and detail-oriented software developer who recently graduated from Orange Coding Academy with a specialization in the ASP.NET stack. My education has equipped me with strong skills in developing full-stack web applications using C#, .NET Core, SQL Server, and modern JavaScript frameworks. I am passionate about leveraging technology to build efficient, scalable, and user-friendly solutions.

Throughout my time at the academy, I have developed a solid understanding of both front-end and back-end development. I have applied this knowledge in various projects, where I focused on writing clean, maintainable code and optimizing performance. My ability to quickly learn new technologies and adapt to different environments has been demonstrated through numerous collaborative projects, where I effectively contributed to team goals and provided innovative solutions.

I am now seeking an entry-level position in the IT field where I can apply my technical expertise, analytical skills, and enthusiasm for problem-solving to deliver impactful results. I am eager to join a forward-thinking team where I can continue to grow professionally and contribute to meaningful projects.

Technical Skills

- **Programming Languages:** C#, JavaScript, HTML, CSS ,Typescript.
- **Frameworks and Technologies:** ASP.NET Core, .NET Framework, Entity Framework, Angular .
- **Front-End Development:** HTML5, CSS, JavaScript, TypeScript , Bootstrap
- **Database Management:** SQL Server, Entity Framework
- **Version Control:** Git
- **Operating Systems:** Windows, Linux/Unix
- **Software Development Practices:** Agile, Scrum
- **Other Tools:** Visual Studio, MS Office (Word, Excel, PowerPoint), RESTful API Development

Soft Skills

Software Development Process Evaluation	Critical Thinking	Time Management
Performance Review	Problem-Solving Ability	Problem-Solving Ability
Data Analytics Skills	Project Management	Effective Communication
Requirement Analysis	Creativity and Innovation	Attention to Detail
	Customer-Centric Approach	Team Collaboration

Experience

Orange Coding Academy, [Location]
Student, Full-Stack Web Development
may 2024 - october 2024
Work Experiences:

- Developed and deployed full-stack web applications using the ASP.NET stack, gaining extensive hands-on experience with C#, .NET Core, SQL Server, and JavaScript frameworks.

- Built responsive front-end interfaces using HTML, CSS, JavaScript, and Bootstrap, focusing on user experience and cross-browser compatibility.

- Implemented back-end logic and database integration using ASP.NET Core and Entity Framework, ensuring secure and efficient data handling.

- Collaborated with fellow students in Agile project teams, applying Scrum methodologies to manage project timelines and deliverables effectively.

- Designed and developed RESTful APIs to enable seamless communication between client-side and server-side components.

- Participated in code reviews and debugging sessions, improving code quality and learning best practices in software development.

- Created and maintained documentation for projects, enhancing the team's ability to maintain and extend applications.

- Used Git and GitHub for version control and collaboration, ensuring smooth workflow and project management across team members.

-

Projects

1) **Building Portfolio:** Developed a personal portfolio website to showcase projects and skills using HTML, CSS, and JavaScript. The portfolio features an interactive user interface that highlights different projects, a detailed resume, and a contact form. Integrated backend functionality with a database to dynamically manage content, enabling easy updates and maintenance.

2) UI/UX : Focused on creating a seamless and intuitive user experience across various web applications. Applied principles of user-centered design to develop wireframes and prototypes, ensuring that interfaces are both visually appealing and easy to navigate. Conducted usability testing and incorporated feedback to refine the user interface, improving overall user satisfaction and engagement.

3) Feedback system : Designed and implemented a comprehensive feedback system for web applications using HTML, Bootstrap, C#,JavaScript. The system allows users to provide feedback, rate services, and report issues. Built a responsive and user-friendly interface to collect user inputs efficiently, and developed backend logic to store, process, and display feedback data, enabling better decision-making and continuous improvement.

4) E-commerce Website: Developed a full-featured e-commerce website using the ASP.NET stack, integrating functionalities such as product catalog, shopping cart, payment processing, and user authentication. Implemented both front-end and back-end components, ensuring secure transactions and a smooth user experience. The website also features an admin dashboard for inventory management, order tracking, and customer service.

5) Election Website: Created an election website to provide comprehensive information about candidates, voting processes, and results. Designed an interactive and accessible interface that allows users to explore candidate profiles, view election updates, and learn about polling locations. Developed secure backend services to handle data processing and ensure the integrity and accuracy of election-related information.

6) HR system: Built a Human Resources (HR) management system using JavaScript,HTML,Bootstrap designed to streamline employee management, recruitment, and performance evaluation processes. Developed modules for managing employee records, tracking attendance, processing payroll, and handling leave requests. Implemented robust security measures to protect sensitive employee data, and created a user-friendly interface for HR professionals to easily navigate and utilize the system.

7) E-commerce Website (Smart supplies) : Developed a fully functional e-commerce website using ASP.NET Core API for the backend and HTML, CSS, JavaScript, and Bootstrap for the front-end. The platform supports product browsing, shopping cart management, secure user authentication, and an integrated checkout process. It also features responsive design, ensuring a seamless user experience across devices. Leveraged SQL Server for secure data storage and management, handling user accounts, product inventory, and order history. Implemented a RESTful API using ASP.NET Core for handling product data, user authentication, and payment processing.
Designed a responsive and user-friendly front-end interface with Bootstrap and JavaScript. Integrated secure data handling using SQL Server to manage customer and order information. Ensured performance optimization and a seamless user experience across desktop and mobile devices.

Education
Al Balqa Applied University, Jordan   2024
Diploma in Midwifery.

Courses and Certificates
- Full stack developer (Orange Coding Academy)
