CAREER OBJECTIVE

Full Stack Web Developer with expertise in both front-end and back-end development, specializing in the PERN and MERN stacks. A graduate of the Orange Coding Academy Full Stack Web Development Boot Camp and holder of a Bachelor's Degree in Software Engineering from the Islamic Sciences University, I am passionate about building high-performance, scalable applications that deliver exceptional user experiences. Seeking an entry-level IT position to leverage my technical skills, creativity, and dedication to contribute to innovative projects while continuing to grow professionally.

SKILLS

PERSONAL
- Problem-Solving
- Team collaboration
- Communication
- Attention to Detail
- Time Management

Front-end
- Next.js
- React.js
- JS(ES7+), typeScript
- HTML5, CSS3
- TAILWIND

Back-end
- Node.js
- Express.js
- PostgreSQL
- MongoDB
- FireBase

Other
- Odoo (CMS)
- Figma
- Postman
- Git / GitHub
- Bash / ZSH

EXPERIENCE

Orange Coding Academy
Full Stack Web Development Trainee   **Dec-2025/Present**

- Completed an intensive Full Stack Development Boot Camp at Orange Coding Academy
- Gained hands-on experience in front-end and back-end technologies: JavaScript, React, Node.js, Express.js, Next.js integrated with PostgreSQL or MongoDB database.
- Focused on building scalable, high-performance web applications
- Emphasized clean code, problem-solving, and industry best practices

PROJECTS

SocialNest: Github Repository

Developed a community platform that enables users to create profiles, post updates and engage in discussions. Implemented features like real-time notifications, user authentication, and content moderation to create a secure and interactive environment.

Tools   Next.ts - PostgreSQL - Prisma(ORM) - ShadCN(UI) - AWS(S3 bucket)

Horizon Villas: Github Repository

E-commerce rental platfrom allowing users to rent villas from property owners. It features property listings, advanced search, real-time availability, and seamless booking.

Tools   React.js - FireBase - Material(UI)

News Platform: Github Repository

Developed a responsive, full-featured news website with role-based access for journalists, readers, and admins. Implemented secure authentication (JWT + Google login), article management, multimedia support, real-time commenting, bookmarking, and admin moderation. Included advanced search, filtering, and analytics in a scalable MERN stack environment.

Tools   React.js - Node.js - Tailwind - Express.js - MongoDB - Mongoose

Donation Platform: Github Repository

Built a responsive web app for a charity with roles for donors, beneficiaries, and admins. Features include secure login like Google, donation tracking, AI-generated tax reports, real-time notifications, and an AI chatbot for support.

Tools   React.js - Node.js - Tailwind - Express.js - PostgreSQL - Sequelize

---
