Skills

- Problem Solving
- PHP
- Time Management
- LARAVEL
- Detail Oriented
- JAVA SCRIPT
- Collaboration
- SQL

Projects

- Let's Bloom: E-commerce web application using PHP and MYSQL. This project has a user side where he/she can view product categories, add products to the cart and proceed for checkout, while from the administration side, the admin can view sales, and users, add products and categories, and can edit, update and delete all the items mentioned previously.

- BoSmart: Rental platform using Laravel. This project has a home page that displays the items that the renter wants to rent in a perfect way with prices. When the renter uses the site, he will browse, search, choose the item and then set a period of time to rent using a calendar then checkout and pay.

- Coding Quizzes: Online quiz website using java script. In this project I build a responsive and dynamic quiz website that requires the user to register and sign in to answer quiz questions, compare the user answers with the correct answers previously saved on local storage and show his result with correct answers.
