Portfolio: My Portfolio

Full Stack Web Developer

CAREER OBJECTIVE

An Electrical Engineer with a passion for programming, transitioned into a Full-Stack Web Developer after intensive training at Orange Coding Academy. Specializing in the MERN stack, I bring a unique combination of technical and engineering skills, enriched by hands-on projects and real-world problem-solving experiences. My engineering background has equipped me with strong analytical thinking, attention to detail, and a solid foundation in soft skills, all of which have been applied successfully in team collaborations and individual projects. I am eager to leverage my diverse skill set in dynamic full-stack development roles, contributing to innovative and impactful software solutions.

Technical Skills

Technologies: HTML, CSS, JavaScript, Node.js, Redux, Next.js
Frameworks/Libraries: Bootstrap, Tailwind CSS, React.js, Express
Database: Firebase, PostgreSQL, MongoDB, Sequelize, Knex.js, Mongoose
CMS: WordPress
Operating Systems: Windows
Software Development Practices (SDLC): Scrum, Agile
Other Tools: MS Office (Word, Excel, PowerPoint), Git (Version Control Systems) ,Trello, Postman

Soft Skills

Analytical Thinking	Team Collaboration	Project Coordination
Problem-Solving Ability	Adaptability	Leadership and Mentorship
Performance Review	Creativity and Innovation	Continuous Learning Mindset
Technical Communication	Time Management	Leadership
Attention to Detail	Critical Thinking	Emotional Intelligence

Experience

Trainee at Coding Academy by Orange   **May 2024 - Dec 2024**

- Intensive course in Full-Stack Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT).

Projects

1) WarshtK
Github Repo: Masterpiece
Description: WarshtK Store is my masterpiece project to graduate from Orange Coding Academy, and this website is about buying different materials and items you need to construct and decorate your house.

2) Entakheb
Github Repo: [Jordan-Elections](#)
Description: Entakheb is a simulation project for Jordanian elections, where I served as a Scrum Master. We used PostgreSQL, Express, React, and Node.js to build the website, which allows users to vote for local and party lists, create new lists, request debates between candidates, and submit requests to display advertisements for candidates on the site. The platform is designed to engage citizens in the election process in a dynamic and interactive way.

3) SkyLine
Github Repo: [Project4-SkyLine](#)
Description: We developed unique styles for SkyLine using ReactJS and Tailwind CSS, and built a Firebase database to store details about users, trips, admins, and messages. We used APIs to deliver this data to the site and created a dashboard for admins to manage user profiles, tickets, and communication via email.

Education

Al-Balqa Applied University (BAU), Amman - Jordan   **Sep 2018 - Feb 2023**

Al-Balqa Applied University (BAU) Bachelor's degree, Electrical Power Engineering
Grade: 3.1 out of 4

Conferences and Training Attended:
- Volunteer at IEEE Jordan PES Conference 2020
- Technical Support Engineer Trainee at Abdin Industrial (Jul 2022 - Oct 2022)

Coding Academy by Orange 7 Months Full-Stack Web Development-Bootcamp   May 2024 - Dec 2024
Intensive course in Full-Stack Web Development in collaboration with Simplon.co
 and Princess Sumaya University for Technology (PSUT)

Certificates
- Emotional Intelligence. (Edraak-2024)
