Summary

Enthusiastic Junior Full Stack Wizard, with a love for crafting smooth applications that sparkle with JAVASCRIPT and REACT magic. Driven by the thrill of perfecting user experiences and amped up to expand my skill set in a dynamic, team-oriented arena. Ready to conquer challenges, learn, and grow!

Work Experience

Professional Accountant

2023-present

- Designed and implemented interactive web interfaces utilizing HTML, CSS, and JavaScript, enhancing user experiences. Leveraged GitHub for project management and seamless project showcase via webpages.
- Fostered efficient team collaboration and task distribution using Trello, optimizing workflow and ensuring on-time delivery.
- Expertly used React for crafting engaging UIs and reusable components, boosting site interactivity.
- Integrated SQL and MongoDB databases into web applications, managing data storage, retrieval, and manipulation while maintaining data integrity.

Projects

ChatBot

This project has been an amazing experience for me, as I've had the opportunity to delve into the realm of conversational AI and discover its boundless potential. Leveraging React as my framework and harnessing the capabilities of OpenAI's API, I've developed a ChatBot that can participate in dynamic conversations, offer insightful responses, and deliver tailored assistance.

Travel Planner

React-based platform for travel exploration and vacation planning, offering users a seamless experience to explore diverse destinations, uncover hidden gems, and plan dream vacations effortlessly.

Books Platform

With my experience in React, I have created a smooth and user-friendly interface that allows you to explore a vast library of books of various genres.
With the Books API, you've integrated comprehensive information such as summary details, making it easier for you to make informed choices about what you read.
