Full Stack Developer

CAREER OBJECTIVE

As a dedicated and innovative full stack web developer, I aim to leverage my skills in CSS, HTML, JavaScript, and PHP, along with my experience in creating dynamic web applications and engaging user interfaces, to contribute to a forward-thinking organization. I am passionate about developing efficient and user-friendly digital solutions and eager to continuously enhance my technical expertise while collaborating with a diverse team to achieve impactful results.

Soft skills

Immense Discipline	Critical Thinking	Communication Skills
Time Management	Problem Solving	Team Work
	Fast Learning	
	Creativity	

Skills

Programming Languages: HTML, CSS, JavaScript, PHP
Frameworks: Laravel, React, Bootstrap, Tailwind, Livewire
Database: SQL, MySQL, SQL Server
Software Development Practices (SDLC): Scrum, Agile
Other Tools: MS Office (Word, PowerPoint), Git, Github, Figma

Education

Orange Coding Academy   **May 2024 – Dec 2024**
Training, Web Development
<u>**Work Experiences:**</u>

- Committed for a 7-month intensive course, where had to attend on sight for 8 hours everyday or over and had to be engaged in training tasks for the last of the day.
- Learned all soft skills needed for work theorilly and practically.
- Learned full tack core technologies like: Laravel, React, WordPress, SQL, MYSQL, PHP, CSS, HTML and more.

Baqa'a High School   **2023**
Scientfic Section, Tawjihi

Academic Projects

1) **Person portfolio website**
   During my web development training, I completed a project where I created a personal portfolio using CSS and HTML. This project allowed me to showcase my skills in front-end

development and design, and demonstrated my ability to build responsive and visually appealing web pages.

2) **Library management website mockup**

I designed a comprehensive library management system using Figma. This project involved creating user-friendly and intuitive interfaces, focusing on enhancing the user experience and streamlining the management process. The design incorporated various functionalities such as book categorization, user management, and tracking of borrowed and returned books

3) Quiz website

I collaborated in a group project to develop a quiz website as part of my web development training. We utilized CSS, HTML, and JavaScript to create an interactive and engaging platform. This project showcased our teamwork and technical skills in front-end development, including dynamic content updates and user interaction features.

4) E-commerce website for furniture

As part of a group project at Orange Coding Academy, we developed an e-commerce website for furniture. Our team used PHP, CSS, JavaScript, and HTML to create a platform with a full range of services, including product browsing, detailed item descriptions, and a seamless shopping cart system. The website featured a user-friendly interface with various interactive elements, providing a smooth and engaging experience for users. This project highlighted our teamwork and proficiency in full-stack development.

5) Rental Website (Laravel-based)

In a group project at Orange Coding Academy, we developed a rental website using Laravel, along with CSS, JavaScript, and HTML. The platform offered comprehensive services for property listings, search filters, and booking management, all integrated into a user-friendly interface. With Laravel as the backend framework, we ensured smooth data handling and robust functionality. This project showcased our teamwork and technical expertise in full-stack development, emphasizing the power of Laravel in building scalable and feature-rich applications.

6) Language Learning Website (Laravel-based)

I am currently working on a language learning website, which serves as my masterpiece project for Orange Coding Academy. Built using Laravel, the platform is designed with a wide array of features to enhance the learning experience. It offers a user-friendly interface with interactive lessons, exercises, and progress tracking to ensure an engaging journey for learners. This project not only highlights the flexibility of Laravel but also focuses on delivering a great user experience through its diverse and dynamic functionalities.
