Full Stack Developer | Software Engineer | Exploring Security

Career Objective

A passionate full stack developer with a solid foundation in web development and hands-on experience in Laravel, React, MySQL, Python, and JavaScript. Skilled in programming, security, and problem-solving, with a strong technical background. Familiar with managing small-scale projects and leading teams, demonstrating effective collaboration and communication. Highly adaptable, quick to learn new technologies, and eager to contribute to innovative projects. Ready to apply technical expertise in a dynamic, growth-focused entry-level IT role.

Core Competencies

Web Development	Adaptability, Continuous & Fast Learning	Time Management
Database Management	Team Collaboration	Effective Communication
Problem-Solving & Debugging	Cybersecurity Awareness	Presentation Skills

Technical Knowledge

- **Development:** PHP (Laravel), JavaScript (ReactJS), Python, Java (Basics), Docker Desktop, HTML, CSS, Bootstrap
- **Database:** SQLite, MySQL, MongoDB, Firebase
- **Operating Systems:** Windows, Linux (Ubuntu, WSL)
- **Version Control & Collaboration:** Git, GitHub
- **Security & Testing Tools:** Burp Suite, Nmap, Postman (API Testing)
- **Other Tools & Skills:** WordPress, Figma, GIMP, Web App Pen-Testing, MS Office (Excel, PowerPoint)

Internships

Orange Coding Academy, Jordan   **Dec 2024 – Present**

Intern, Full Stack Web Development

Hands-On Experience:

• **Designed and implemented responsive web layouts** using HTML, CSS, JavaScript, and Bootstrap, while utilizing Figma for wireframing and creating mockups.

• **Developed an interactive online quiz platform** (QuizAce) leveraging JavaScript for dynamic features, including user authentication, quiz selection, quiz interaction, and profile management with quiz history.

• **Built a comprehensive e-commerce website** (Halwa Bliss) using JavaScript, raw PHP, and MySQL, featuring secure user authentication, product listings, a shopping cart system, and secure transaction handling.

• **Developed multiple Laravel-based projects**, including:
  - Movies Website with CRUD functionality, Two Roles, Movie Listing, and Reviews.
  - Ticket Management Support System for handling customer complaints.
  - Library Management System API with authentication (Sanctum).

• **Created a feature-rich car rental platform** (Rent Rover) using Laravel, incorporating dynamic functionality for search, filtering, listing management, and reservations, designed to support multiple user roles and interaction.

• **Developed a contract management system** (APEX) in React & Firebase, with features including user profiles, dynamic contract grids, and admin controls for approval and deletion. Implemented contract expiration alerts, profile update functionality and a PDF export option for contracts. Improved UX with pop-up details, color-coded contracts, and more.

• **Currently developing a pharmacy management system** with Laravel, Livewire, and MySQL to track medicines, sales, and user roles, featuring an admin and employee panel for efficient pharmacy operations.

Education & Credentials

Yarmouk University, Jordan   **2021**

B.Sc. in Pharmacy,
Grade: 4 out of 4 (Excellent, 93.4% CGA)
