SUMMARY

As a Junior Full Stack Developer, I'm driven by my passion for coding and a desire to turn my big dreams into reality. With expertise in HTML, CSS, JavaScript, and MERN Stack, I enjoy building responsive web applications and designing intuitive interfaces. I thrive in dynamic environments, collaborating effectively with diverse teams. Let's connect and create amazing things together

SKILLS

- HTML5
- CSS
- UI&UX Design
- JavaScript
- React.js
- React Native
- Responsive Web Design
- MongoDB
- Express.js
- Bootstrap
- REST APIS
- Node.js
- Agile Web Development
- Problem Solving
- Git / GitHub

EDUCATION

Coding Academy by Orange   • Feb.2023-Aug.2023

WORK EXPERIENCE

Full Stack Web and Mobile Development , Coding Academy by Orange Fep2023 - Till Now

- *Comprehensive MERN stack coding bootcamp, gaining proficiency in MongoDB, Express.js, React.js, and Node.js.*
- *Demonstrated strong problem-solving skills by resolving complex coding challenges during bootcamp projects.*
- *Actively contributed to the development of a responsive and user-friendly web application using React.js.*
- *Collaborated effectively with team members to build and deploy a fully functional server-side application utilizing Node.js and Express.js.*
- *Embraced agile development methodologies, such as Scrum and Kanban, to deliver projects within deadlines and maintain a high level of productivity.*
- *Showcased adaptability and a growth mindset by quickly learning new technologies and implementing them in practical projects.*
- *Received positive feedback from instructors and peers for my dedication, teamwork, and commitment to continuous learning.*

PROJECTS

Travel Planner   (Live Demo)

This project involved creating an application where users can search for tours and make reservations. I implemented intelligent algorithms to provide personalized recommendations based on user preferences, and designed a visually appealing and responsive interface using React and Bootstrap.

Github Finder   (Live Demo)

As a proficient JavaScript developer, I have successfully cloned the GitHub site and utilized its API to perform a detailed comparison between two repositories. Leveraging my skills in JavaScript, I developed a robust solution that analyzed various aspects of the repositories and determined a winner based on predefined criteria.

AI ChatHub   (Live Demo)

This project has been an incredible journey, allowing me to dive deep into the world of conversational AI and explore the limitless possibilities it offers. With React as my framework and OpenAI's API as my powerful tool, I've created a ChatBot that can engage in dynamic conversations, answer questions, and provide personalized assistance.
