Academic Projects

1) Task Management System (Scrum Master)
Description: A task management tool, Tasky, is designed to help individuals and teams efficiently organize and track their projects and tasks. Developed with HTML & CSS for styling, JavaScript for dynamic content, and a JSON server for data handling, Tasky provides a streamlined user experience for effective task management.
GitHub Repo   Video Demo

2) E-commerce website for used furniture
Description: An online platform specifically designed for buying and selling used furniture. Built with HTML & CSS for the front-end design, Bootstrap for responsive layout, JavaScript for interactive elements, and PHP for server-side processing, this e-commerce website offers a user-friendly interface.
GitHub Repo

3) Travello
Description: Travello is a flight booking website for a single airline, built using Bootstrap, Laravel and MySQL. It provides an easy way to search, select, and book flights, offering a secure and user-friendly experience.
