Other Tools: MS Office (Word, Excel, PowerPoint), Git (Version Control Systems)

Academic Projects

(1) https://github.com/dania970/protfolio.git
Description: project, 'My Personal Portfolio' I used enjoyable technology in this project, utilizing Bootstrap for the Navbar and developing the rest of the sections using HTML and CSS only.

(2) Building an **https://github.com/dania970/laravel5.git**
Description Sona Hotel is a luxurious establishment offering top-notch services and amenities to its guests. Located in a prime area, the hotel provides an exquisite experience with comfortable rooms, exceptional customer service, and various modern facilities. Managed by a dedicated team, Sona Hotel ensures a memorable stay for every visitor. The hotel's online platform allows Lessors to manage bookings, add room details, and handle reservations seamlessly, while Renters can easily book their desired rooms. Admins maintain the overall system, ensuring smooth operations and security.
To bring our website to life, we used a variety of technologies:
HTML & CSS: The foundation of web development, these tools allowed us to structure and style our web pages.
Bootstrap: This framework ensured our website looked great and functioned seamlessly across all devices.
JavaScript& php& Laravel : We leveraged JavaScript to add interactive features, validate forms, and manage data effectively.

It was a great experience being the Scrum Master for this team, where we all worked together, supporting each other every step of the way.
