Summary

Aspiring Full-Stack Developer with hands-on experience in HTML5, CSS3, JavaScript (ES5 & ES6), React, PHP (Laravel), and MVC design patterns. Proficient in building responsive, user-friendly interfaces and developing full-stack web applications. Experienced with DOM manipulation, AJAX, and implementing server-side logic. Currently seeking opportunities to further develop my skills and contribute to innovative, real-world projects in a dynamic development environment.

Education

Bachelor of Science in Computer Science, *University of Jordan, Amman, Jordan*   2019 – 2024

English Proficiency (C1 Level)
AMIDEAST | 40-Hour English Course

Full-Stack Development Certification, *Dot Jordan | Oct-2023 – Jan 2024 | 100 Hours of Training*

Professional Experience

Orange Coding Academy   09/2024 – present
Full-Stack Developer Intern

- Developed responsive web applications using HTML5, CSS3, JavaScript (ES5/ES6), and React.
- Built server-side functionality with PHP (Laravel), following the MVC design pattern for maintainability.
- Integrated AJAX for dynamic data updates and seamless user experiences.
- Worked with SQL databases to design schemas, write queries, and manage data storage.
- Collaborated in a team environment, contributing to both front-end and back-end development.

Dot Jordan   10/2023 – 01/2024
Full-Stack Development Training

- Completed training in Full-Stack Development, covering front-end technologies like HTML5, CSS3, JavaScript, React, and Bootstrap, alongside back-end development with PHP (Laravel). Certified with hands-on experience in building responsive web applications.

Skills

Technical Skills:
- **Web Development**: HTML5, CSS3, Bootstrap, JavaScript (ES5 & ES6)
- **Programming Languages**: JavaScript, PHP
- **Frameworks**: Laravel, React
- **Database Management**: SQL
- **Asynchronous Programming**: AJAX
- **Version Control**: Git
- **Agile Methodology**: Familiar with Scrum, Product Owner roles, and Agile principles

Soft Skills:
- **Team Collaboration**
- **Communication**
- **Problem-Solving**
- **Time Management**

Projects

E-Commerce Website (Nest and Buy)
Technologies: HTML5, CSS3, JavaScript, PHP (MVC)
- Collaborated in a team to develop a full-featured e-commerce platform, implementing features like add to cart, remove from cart, apply/remove coupon, and order management.
- Contributed to building an Admin Dashboard to manage orders, reviews, coupons, and user profiles.
- Implemented order cancellation with a 24-hour limit, enhancing the customer experience by allowing users to manage their purchases.
- Worked on other features (such as payment integration, user authentication, and product search) as part of the team, ensuring seamless functionality and user experience.

Nest and Quest (Booking System)
Technologies: HTML5, CSS3, JavaScript, JSON Server
- Developed a booking system to save user data in a JSON server for a mock hotel booking platform.
- Implemented front-end features such as booking form, user input validation, and data storage in JSON format.

Netflix Clone Project
Developed a Netflix clone using Laravel. The application includes:
- User Authentication: Login and logout functionality.
- API Integration: Fetch and display trending movies and Netflix originals using an API key.
- Watchlist Feature: Users can add and manage movies in their watchlist.
- Dynamic Front-End: Ensured a responsive and user-friendly interface.
