OBJECTIVE

Motivated and hardworking Junior Software Engineer with a passion for utilizing technology to develop innovative solutions for customers. Seeking to leverage my programming and debugging skills to improve application scalability, reliability, and usability. Committed to a culture of collaboration and excellence, with a dedication to staying up-to-date on the latest development standards and best practices.

Experience

Oct-2021 Till May- 2023
MAB

Computer Aided FM

Infor EAM administrator

June-2023 Till Dec-2023
Orange Coding Academy

Full Stack Development 6 months intensive Course

I have honed a versatile set of web development skills during my time at Orange Coding Academy. This includes expertise in front-end technologies such as HTML, CSS, and JavaScript (JS), enabling me to create well-structured web content and design visually appealing web pages. Additionally, I am proficient in React, a powerful front-end framework, which allows me to craft dynamic user interfaces for single-page applications. On the back-end, I have mastered PHP and the Laravel framework, equipping me to develop robust, scalable, and secure web applications. Furthermore, my proficiency in Git for version control ensures efficient code management and collaboration within development teams. These comprehensive skills make me a well-rounded web developer, ready to contribute to innovative and dynamic projects
