SUMMARY

A Management Information Systems graduate with hands-on experience in full-stack development through training at Orange Academy Coding. Proficient in PHP, JavaScript, HTML, CSS, and Laravel, with a strong foundation in problem-solving, analytical thinking, and software development best practices.

WORK EXPERIENCE

Orange Coding Academy Trainee　　　　　　　　　　　**Jan 2025 - Present**

• Gained practical experience in web development, working on both front-end (using HTML, CSS, JavaScript) and back-end (with PHP and Laravel) technologies.

• Developed and integrated APIs for seamless communication between front-end and back-end systems.

• Gained experience in database management, ensuring data integrity and optimizing performance.

• Worked within a development team, enhancing collaboration, problem-solving, and debugging skills across various stages of the development process.

EDUCATION
　　　　　　　　　　　　　　　　　　　　　　　　sep 2020 - Aug 2024

University of Jordan - Bachelor of Management information system

---

SKILLS

- Problem-Solving.
- Data Analysis.
- Critical Thinking.
- Time Management.
- Attention to Detail.
- Adaptability and Teamwork.

TECHNICAL KNOWLEDGE

- HTML- CSS
- JAVASCRIPT
- React.js
- Php
- My sql
- APIS
- Laravel

CERTIFICATES

- PHP
- SQL
- ICDL
- Html
- Css
- Javascript

PERSONAL INFORMATION

Nationality : Jordanian

Date of Birth : 19 April 2002

Marital Status : Single

Language : Arabic and English

PROJECTS

Portfolio Website ([GitHub Repo](#))

- This was my very first portfolio project, and it truly pushed me out of my comfort zone! I built it entirely from scratch using pure HTML and CSS, without relying on any frameworks – an experience that gave me a solid grasp of web design fundamentals.

- I placed strong emphasis on layout and responsiveness, ensuring the website delivers a smooth and seamless experience across all devices.

Moflixe Movie Website ([GitHub Repo](#))

- Created a dynamic movie website using **HTML, CSS, Bootstrap, and JavaScript**. It fetches real-time movie data through an **API** and displays movie info like posters, ratings, and descriptions. Moflixe was a fun project to improve my skills in working with APIs and responsive UI design.

Medistore - Health Supplies Website ([GitHub Repo](#))

- Developed a full-featured health supplies website using **HTML, CSS, Bootstrap, JavaScript, PHP, and MySQL**. Includes a powerful **admin dashboard** to manage products, users, and orders. Medistore helped me gain solid experience in full-stack development and building dynamic e-commerce systems.

JoHotels - Hotel Booking Platform ([GitHub Repo](#))

- Built a complete hotel booking system using **HTML, CSS, JavaScript, Bootstrap, PHP, SQL, and Laravel framework**. The platform allows users to browse, search, and book hotels easily. Includes a fully functional **admin dashboard** for managing hotels, bookings, users, and room availability. This project sharpened my skills in backend logic, database integration, and Laravel **MVC architecture**.

Tarood Al-Khair - Charity Platform ([GitHub Repo](#))

- Developed during the **"Code for Good" Hackathon using HTML, CSS, and JavaScript (no theme used)**. A volunteer-based platform designed to organize and simplify the distribution of charity parcels during Ramadan in jordan. It allows users and volunteers to register and participate in charitable activities.
