SUMMARY

To apply my expertise as a full stack developer in a dynamic and innovative environment, contributing to the development of cutting-edge applications and solutions. I aim to leverage my technical skills and collaborate with a diverse team to create robust, scalable, and user-centric software products. With a focus on continuous learning and staying up-to-date with emerging technologies, my objective is to deliver high-quality code, meet project deadlines, and exceed client expectations while driving positive user experiences.

EDUCATION

Animation & Computer graphics | Al-blaqa Applied University   2018-2021

EXPERIENCE

Web developer | Orange Coding Academy   Feb2023-July2023

- Demonstrated expertise in creating captivating user interfaces using JavaScript, HTML, CSS, Bootstrap, and React.js.
- Proficient in server-side development with PHP, MySQL, Laravel, and effectively managing databases and their relationships.
- Involved in the entire software development lifecycle, from design to development and rigorous testing, while following industry best practices.
- Actively contributed to problem-solving sessions and shared knowledge with a talented team of developers, fostering a collaborative environment.

Computer maintenance | Al-blaqa Applied University   Sep2020-Feb2021

- Coordinated and facilitated training programs for staff and faculty at Balqa University to enhance their skills and knowledge across various areas.
- Developed detailed training plans and materials tailored to specific learning objectives.
- Conducted interactive training sessions, workshops, and seminars, utilizing engaging teaching methods to encourage active participation and retention of knowledge.
- Collaborated with subject matter experts to deliver specialized training modules on instructional design, technology integration, and professional development.
- Evaluated training effectiveness through assessments and feedback mechanisms, driving continuous improvement in the learning experience for participants.

SKILLS

- Project management
- Communication
- LARAVEL
- CSS
- Technical expertise
- Problem-solving
- JAVA SCRIPT
- REACT
- Leadership
- Attention to detail
- HTML
- PHP

PROJECTS

Rental Platform   **May 2023 - Jun 2023**

- Technologies used: Laravel framework / MySQL / MySQL / JavaScript / CSS / Bootstrap
- Description: The Apartments for Rent platform is a website that offers a comprehensive listing of available apartments for rent. Users can search and browse through a wide range of apartments based on their preferred location, budget, and specific requirements. The platform provides detailed information about each apartment, including descriptions, photos, amenities, and contact information for the property owner or rental agent.

Tickets Website   **May 2023 - Jun 2023**

- Technologies used: Laravel framework / MySQL / MySQL / JavaScript / CSS / Bootstrap
- Description: The Tickets Website is a platform designed for users to submit their technical problems or support requests. The website serves as a communication channel between users, administrators, and employees. The process begins with users submitting their problem tickets through the website. The admin then reviews and assigns the tickets to the appropriate employees or technicians based on their expertise.

E-commerce Website   **Apr 2023 - May 2023**

- Technologies used: Pure PHP / MySQL / JavaScript / CSS / Bootstrap
- Description: The e-commerce electronic devices website is an online platform that offers a wide range of electronic devices for purchase. Users can browse through a diverse selection of products, including smartphones, laptops, tablets, cameras, and other electronic gadgets. The website provides a user-friendly interface with intuitive navigation, allowing users to easily search for specific products or explore different categories.

Quizzes Website   **Mar 2023 - Apr 2023**

- Technology used: Pure JavaScript / CSS / Bootstrap
- The quizzes website is a platform that allows users to take quizzes on various topics. It presents questions to the user and provides options to select the correct answer. The website include features like scoring, timers, and multiple quiz categories.

Portfolio website   **Feb 2023 - Mar 2023**

- Technology used: Pure CSS3
- Description: The professional portfolio website is a dedicated online platform that highlights my professional background, skills, and accomplishments. It serves as a comprehensive showcase of my work, projects, resume, and contact information.
